

WTS

Tilt Swing Lenspanels

KEY FEATURES

- Knob driven fine-gear movements for tilt and swing
- +5°/ -5° tilt and +5°/ -5° swing into both directions
- Separate movements for tilt and swing, individual or simultaneously
- No need for separate adapter, all mechanics built-in
- High precision mechanism
- Center of rotation close to optical center of the lens avoiding image shifts
- Interchangeable with existing Wide DS, RS and compact bodies and panels
- Movement indicators separate for repeatability
- Shift possibilities in the WideRS body allow for shifts without changing lens position
- Available with Rodenstock's 28HR, 35HR, 32HR, 40HR, 50HR, 70HR, 90HR-SW
- Also available with Rodenstock 180HR and in various Retrofit situations

Cambo offers WTS lenspanels with built-in tilt and swing options for the Wide Family cameras.

The use of tilt and/or swing will allow the photographer to optimise sharpness in a plane that is other than perpendicular to the optical axis. Increase sharpness close by while keeping sharpness further away, keep the best sharpness along a plane directing to the vanishing point. Or create intentional unsharpness with lenses that have a great depth of field by nature.

Add those possibilities to your creative process and be ready to create your best images ever using Cambo's tilt/swing lenspanels.

All models and technical specifications are subject to change without notice.
