Please read this manual carefully before using the Cambo WRS-1060 holder!

**CAUTION:** Tighten the clamping knob with care, do not over tighten the clamp!

**CAUTION:** Before use ensure that the Iphone® is mounted correctly!

The Cambo WRS-1060 holder is compatible with the Apple® Iphone® 4/4s and 5/5s.

The WRS-1090 can be mounted directly to the Cambo WRS-1200 series.

For camera’s that feature a accessory shoe mount, the WRS-1095 shoe adapter can be used.

For the Cambo Anniversary Edition camera the WRS-1096 WRS-AE adapter can be used.

The centring pins ensure a correct alignment of the Iphone® holder.

Before inserting the Iphone® 4/4s or 5/5s in the holder please loosen the clamp by turning “knob A” counter-clockwise. When the clamp part is all the way up, now you can gently insert the Iphone® in the holder (as displayed in the image above).

When the Iphone® is fully inserted in the holder, please ensure that the backside of the Iphone® is parallel to and touching the holder. Now you can gently tighten “knob A”, don’t over tighten the clamp!, this could damage your Iphone®.

Note: when the volume knobs are pressed, the Iphone is not parallel to the holder, please adjust the alignment of the Iphone®.

For use with the Iphone® 4 or 4s please install the rubbers as shown in the image above.

For use with the Iphone® 5 or 5s please install the rubbers as shown in the image above.
The WRS-1090 Iphone holder uses the Schneider Optics® Century® wide angle lens (0.65x). The Century iPro lens system uses a bayonet mount.

Fasten, turn counter-clockwise (CCW)
Please align the bayonet and mount shape of the holder and insert the lens. To fix the lens please turn the lens counter-clockwise (30° turn).

Loosen, turn clockwise (CW)
To loosen the lens please turn the lens clockwise. After a 30° CW gently take out the lens.

To change form “landscape” to “portrait” format, please press “Lock B”. While pressing the lock you can turn the Iphone® holder CW.

At a 90° turn the lock snaps in the new position and is fixed. To return to landscape position please press “Lock B” again and turn the Iphone® holder 90° CCW until the lock snaps into the new position.

Viewfinder Pro (iOS App) www.direstudio.com/viewfinder
You can use the “Viewfinder Pro” App, designed by “DIRE Studio”. This App is available on the App Store. For instructions please download the “Viewfinder Handbook” at “direstudio.com”.
