

HOW TO ASSEMBLE THE CAMBO SF CAMERA

1. Unpack box first layer

A: monorail/cameramount
B: front standard
C: rear standard

2. Unpack second layer

D: housing front
E: housing rear
F: bellows
G: ground glass back

3. Setup Monorail

Remove railcover on one end

4. Place first front standard then rear standard

Note: Focusknobs on righthand side

Rear standard has spirit level and depth of field scale

Replace railcover onto monorail.

5. Mount houses on front and rear standard

Note: Spirit levels on righthand side

Tighten 4 screws with allen key to lock housings.

6. Place bellows and ground glass back into front and rear housings, using the slider locks on top of the housing.

For further use of accessories and depth of field scale see the general Instruction Manual.

INSTRUCTIONS FOR FOLDING THE SF CAMERA

1- Adjust the camera to maximum extension.

Stel de uittrek van de camera op maximaal.

Die Kamera auf maximale Länge ausziehen (incl. der Feintrieb).

Ajuste la cámara a la máxima extensión.

Ajuster la camera à son tirage maximal.

2- Disconnect the bellows from the front standard. Lower the front standard to bottom position.

Maak de balg los van de voorstandaard. Verplaats de voorstandaard in de onderste positie.

Den Balgen von der Frontstandarte lösen.

Separe el fuelle del montante frontal. Baje el montante frontal a su posición más baja.

Détacher le soufflet de la partie avant et positionner le porte objectif aux niveaux le plus bas.

3- Tilt the housing of the front standard 90° backwards.

Zwenk het huis van de voorstandaard 90° naar achteren.

Die Frontstandarte 90° rückwärts schwenken.

Incline el montante frontal 90° hacia atrás.

Pivoter la partie avant de 90° vers l'intérieur.

4- Tilt the housing of the back standard 90° forward, folding the bellows over the lens. Minimise the extension.

Zwenk het huis van de achterstandaard 90° naar voren, zodat de balg over de lens valt. Stel de uittrek zoveel mogelijk terug.

Die hintere Standarte 90° nach vorn schwenken und den Balgen über das Objektiv legen. Den Auszug verringern.

Incline el montante posterior 90° hacia adelante, plegando el fuelles sobre el objetivo. Minimice la extensión.

Pivoter la partie arrière de 90° vers l'avant de manière à ce que le soufflet couvre l'objectif et minimise le tirage.

5- Place the camera into the SF-20 soft case.

Plaats de camera in de SF-20 koffer.

Die Kamera in die SF-20 Tasche legen.

Coloque la cámara dentro de la bolsa de transporte SF-20.

Placer la camera dans le coffre SF-20.
