

PRESS INFORMATION

September 20, 2016 - Photokina

Cambo Fotografische Industrie is proud to present new products on this exhibition, during their 70 years anniversary celebration of the Cambo factory in The Netherlands.

WRS-1600 - Architectural / Landscape

The Cambo WRS-1600 series is a new addition to the Wide RS Family, made from high grade aluminium as used in aerospace technology.

A unique feature of the WRS-1600 is its ability to rotate the full camera/lens/back assembly in the tripod mount between landscape and portrait mode within seconds, without removing any part and still keeping the optical center in the same position.

More product information can be found on our website under this link:

ACTUS-XL - View Camera

With the introduction of the ACTUS-XL series, Cambo's system is now extended across the Actus line of camera products. Where the Actus Mini excels in being the lightest and smallest camera platform, the ACTUS-XL system is a fusion of both the Actus and Ultima camera platforms, maintaining full camera movements. **Modular is the keyword.** The Actus-XL accepts all Actus lens plates and lens adapters, sharing the same mount. On the rear standard you find an easy exchangeable frame holder for either a digital back or a DSLR/Mirrorless camera body.

MBX - Studio Stand

This new classed Mid-range studio stand will suit many photographers shooting with medium format camera systems. It is placed between the entry level Monostand and the heavier duty UST/UBS stand series.

The MBX stand combines several advantages of the various Cambo stands, such as a ball bearing movement for effortless vertical adjustment as well as rotation of the crossarm independently of vertical adjustments, derived from the Cambo UBS stand. The MBX's counterweight is optimised for a medium format camera with lens and tripod head. This can easily be adjusted if you choose to add the laptop support tray with computer, or you need to fine-tune your own ideal set-up.

More product information can be found on our website under this link:
