

# LENSCARD INFORMATION

The Wide DS Lens Systems are supplied with a Lens Card. The card shows the amount of shift that is possible with this specific lens. The picture below shows the 58XL card. The arcs always represent the 166mm Image Circle. The image circles are positioned for each possible image format to show the shift possibilities for this Lens System. The darker rectangular area represents the shift possibilities of the Wide DS

Example:  
32mm Shift Vertical  
indicates maximum:  
11mm Shift Horizontal

6x9cm Landscape  
orientation

P = Portrait orientation  
L = Landscape orientation

Colour: blue  
58XL Lens System

Camera for shift upward in combination with left or right shift. The Wide DS has 20mm shift downward which is corresponding the first 20mm shift upward on the card. The example shows a combination of maximum possible shift.

NOTE: The Lens Card for the 38X Lens System (not displayed) does show the image circle for the 4x5" format because the lens does not cover the format completely (137mm).
